

A heart-warming Email from Joseph Chen

Entering Princeton University in Fall of 2018

Dear Ms. Elizabeth and Mr. Dennis,

Good news! I am excited and grateful to be accepted Early Action into Princeton University's School of Engineering and Applied Sciences as a prospective EE major!

I have been a student at Storming Robots from 5th grade up until my high school graduation. I attribute my initial interest in engineering to Storming Robots, especially for introducing me to a conceptual and mathematical oriented approach to learning CS.

Your mentorship had been particularly helpful, often finding projects catered for my individual growth and sending emails with valuable advice to help supplement my application. From a young age, I was exposed to a challenging, but encouraging, environment that allowed me to build a solid foundation on how I approached STEM throughout high school. And for the next six years, you helped me develop a versatile mechanical and software skillset as well an intuition that I translated to many of my independent projects. Because of this, I greatly appreciate your guidance as both an inspiring instructor and a life mentor.

Thank you for acquainting me with bright students, providing me with my first job experience, and giving me the privilege to call this milestone a dream come true. I cannot wait to begin pursuing a B.S.E. degree with a tentative interest in the Internet of Things, artificial intelligence technology, and entrepreneurship. I will continue to keep you updated and I hope Storming Robots continues to be an inspiration to others as it had been to me!

Forever indebted and eternally grateful,

Joseph Chen
