

Thank you notes from one of our past long term employees...

March 3rd, 2022

Dear Elizabeth (and Dennis),

I have been drafting this letter for weeks. Trying to find the right words. Big enough words to express the genuine gratitude and deep appreciation I have for all the training, teaching and modeling of excellence that you poured into me these last years.

To say that you have positioned me for the utmost success in my new career would be an understatement. The level of understanding that you helped me to achieve in regard to effective policies, careful written communication, organization and overall program use and application has helped me to stand out to the executives here in such a short time. And I want to emphasize understanding and application of, not just seeing and doing. I always valued this model that you hold true to, but being on the other side has helped me to be that much more independent. You also gave me the tools to improve quality of performance, and I hope to implement that as I go forward in my career.

Miss you guys and SR tons!

—thank you
