12th Grade

5th grade

Arjun Subramanian's

journey with Storming Robots began in 5th grade and continued through the end of 9th grade. From early on, he stood out for his exceptional algorithmic thinking and thoughtful approach to problem-solving. In recognition of both his technical strength and his character, we invited him to join our Computer Science instructor team starting in 10th grade—where he has consistently made a meaningful, positive impact on our students.

Hi Ms. Mabrey,

I wanted to thank you for all that you have done for me throughout my time at Storming Robots.

I remember back in 5th grade first joining Storming Robots with just enough programming experience to write a for-loop in python. Through the Algorithms track you taught me to develop my algorithmic thinking and problem solving skills. These early fundamentals helped develop my love for computer science, which you helped me pursue throughout high school.

With your guidance I also competed in the USACO contests entering the Gold Division and took AP CSA early to skip a course at my school. I was grateful to be invited as an instructor at Storming Robots which really helped build my communication skills.

Thank you for your consistent effort to help me take on new challenges and learn new things. I am grateful for my experience at Storming Robots which have prepared me to study computer science at college.

Sincerely,
Arjun Subramanian

— from Arjun's parent —

Hi Ms Mabrey

Thanks so much for everything you have done for us and Arjun. He has had a phenomenal start with you and it continued throughout his high school years - thanks to the foundation he built with you!
